The next meeting of the Delta and Northern California Clean Boating Network in August 19 at the Berkeley Marina.

Speakers include:

Updates

Molly Munz - Coastal Marinas Permit and State Board Activities

1. A letter from the State Water Resources Control Board Division of Water Quality has posted a letter regarding the proposed coastal marina permit on the

Water Board website:

http://www.waterboards.ca.gov/water_issues/programs/nps/docs/reg_solutions/coastalmarinapermit_jul10.pdf

Molly Munz will be sending announcements and information about the proposed coastal marinas permit through the Water Boards email list. Please subscribe to the Water Boards lyrics listserve at this link:

http://www.waterboards.ca.gov/resources/email_subscriptions/swrcb_subscribe.shtml

1. Fill in your email and name
2. Select: Water Quality
3. Scroll down to mark the box next to Coastal Marinas Permit
4. Click the subscribe button.

The grand total of members subscribed to the coastal_marinas_permit_email list is 232. From dates from July 1 to July 31, 2010, new members to this list total 11.

2. The State Board is working with stakeholders to conduct studies by funding a 319h grant of 600 thousand dollars to Shelter Island Marine in San Diego for financial incentives to repaint boats with non-copper based paints.

3. The State Board sent a letter to Assemblyman Silva in response to his request for additional information.

Vivian Matuk – Flares

Only 13 out of 58 Household hazardous wastes centers collect marina flares. There is a working subcommittee composed of Vivian of the California Coastal Commission (CCC) and Department of Boating and Waterways (DBW), DTSC, CalRecycle and the CCC.

Vivian calculated the estimated number of expired flares generated along the coast of California in one year, **174, 026**. The group wants to find the best solution for the whole state.

Producer responsibility may be the best solution. Statewide legislation for producer responsibility did not go through legislation. Individual products are resulting in product responsibility like batteries.

The California Product Stewardship Council works on producer responsibility and a next step is to contact this group.

Education is the next step in getting flares disposed of properly. The DBW can conduct a mass mailing, use the Dockwalker program, and harbor masters to get information to boaters.

Mara Noelle – Plastics

AB 1998 is a plastic bag eliminates the distribution of plastic bags in California and encourage the use of paper bags made with recycled paper. It will be heard again on August 13th by the Senate Appropriations Committee.

Molly Munz states there is a Marine Debris Working Group. It is a non-enforcement function that studies resources of needles P-3 pellets. These pellets are not regulated by industry. Pellets are coming from transportation, dropping from trains in transit.

The end products made from the pellets can be regulated through a stormwater permit, trash can be part of an MS4 permit.

Jenny Newman – In the LA region, the Regional Board has a trash TMDL in Santa Monica Bay for harbors.

Barbara Heinsch - Doc Powell is working with CalRecycle on removing abandoned commercial vessels between Bradford Island and Webb Track.

Nan Singhasemanon – The reevaluation of copper paint has been publicly noticed by the Dept. of Pesticide Regulation

He will be reporting on the recent risk management decision by the EPA on microbial uses of copper in the Antifouling portion of the meeting.

Main Speaker – Virginia St. Jean, San Francisco Department of Public Health

Please see the attached document containing Virginia's Powerpoint presentation.
